SUMMARY

Software Developer specializing in the MERN stack, experienced in building scalable, high-performance web applications with React, Next.js, Node.js, and MongoDB. Skilled in designing optimized REST APIs, implementing secure authentication flows, and developing responsive, component-driven frontend architectures. Focused on clean code, real problem-solving, and delivering production-ready features that improve performance and user experience.

PROFESSIONAL EXPERIENCE

QriosX (Intern)

September 2025 - Current

Frontend Developer

- Developed scalable, high-performance UIs using Next.js, ensuring responsiveness and fast load times across devices.
- Implemented UI/UX feedback to improve design consistency, usability, and performance.
- Collaborated with design team to translate Figma prototypes into pixel-perfect, functional interfaces.

SKILLS

- Programming & Development:** JavaScript, TypeScript, Python, C, C++
- Frontend:** React.js, Next.js, Redux, Vite, TailwindCSS, Zustand, SCSS, Optimistic Rendering
- Backend & Databases:** Node.js, Express.js, RestAPI, MongoDB, PostgreSQL, MySQL, SQL, Prisma
- Dev Tools & Platforms:** Git, GitHub, Vercel, Netlify, Postman
- DevOps & Cloud:** Docker
- Soft Skills:** Product Thinking, Problem Solving, Team Collaboration, Fast Execution, Agile Development

EDUCATION

Indian Institute of Information Technology (IIIT), Sonapat

Nov 2022- May 2026

Bachelor's of Technology in Computer Science

PROJECTS

LinkSaver

- A bookmarking and link **organization** platform designed to help users efficiently **save, categorize, and search links** and resources. Supports nested collections, tag-based search, multi-profile organization with **drag and drop** features & Google OAuth 2 authentication
- Built using **Bun, React & Redux, PostgreSQL, GoLang, Gin, Git, Docker, JWT** authentication, and other essential packages

Picstone: Image to Story Generator

- Developed an interactive storytelling platform using **Flask, React, MySQL and Google Auto Tagging** for image analysis.
- With **180K+ event registrations, 9K+ users engaged, 80K+ views**, and an average engagement time of 4 minutes and 42 seconds, Picstone was ranked top 5 in **Generative AI hackathon** on Peerlist and Replit.

Cognize: CRM application for freelancers

- Developed Cognize, a **lead management** web app with centralized storage, scraper-integrated **APIs (<200ms latency)**, and a **drag-and-drop UI** for streamlined workflow management.
- Built with **Bun.js, TypeScript, Next.js (Zustand), GoLang, PostgreSQL, Nginx**, deployed on **AWS EC2/EBS**, and secured with **OAuth 2.0** authentication

CustomCV: Personalized Cover Letter Generator

- Launched an **AI-powered tool** to create **personalized cover letters** tailored to each job application.
- Achieved with TypeScript, MongoDB, Node.js, Express, Flask, AWS, Framer, and Git, using a scalable class-based architecture.

OTHERS

- Self-Initiated Projects:** Developed various self-initiated products, including **Automation tools, AI calling, Exam preparation apps, AI marketplace, Generative AI products, Event management, Medical applications, Application management and Travel apps.**
- Leadership Experience:** Coordinated and led multiple clubs and events, resulting in a greater participation rate and the supervision of multi-functional project teams.
